25X1 Proposed  Notice Regarding Standardization of Filing Supplies

25X1 1. The attached proposed notice combines the contents of Notice  issued 12 October 1953 and Notice  which is now being coordinated. These notices were prepared in order to achieve economies in the procurement and stocking of folders, to reduce the number of types of such folders, and to establish standards for their utilization.

25X1 2. This notice is necessary in order that  may requisition and use standard items of supply whenever possible, and eliminate the need for Logistics Office to process individual purchase orders for non-standard items. It does not, however, pre-clude the procurement and use of such non-standard items   when conditions warrant them.

25X1 Attachment  
Proposed  Notice Regarding  
Standardization of Filing Supplies
